

PRICE LIST (ESTIMATED)

*note that the prices listed are rough estimates.

Final prices may vary based on length, format, amount, delivery method and bonus packages.

DATES VALID

10/31/09 - 2025

Prices are determined by complexity of format, amount of time required and commonality of format, among other factors.

If your tape/unit exceeds the standardized runtime (stated below), we count it as a new hour.

If you do not see your format in the list, don't worry! We can digitize most formats! Reach out to us and we will help you.

ADDITIONAL

Delivery format		(all time estimates are in standard def)
DVD	You get your delivery on a DVD.	\$10.00 /disk (4,7GB, 120m)
USB	You get your delivery on a S&R branded USB stick.	\$20.00 /flash drive (8gb,40-120m)
Blu-ray	You get your delivery on a Blu-ray disk.	\$50.00 /disk (10h)
Cloud Storage	We host your files on our private CloudCity web storage service. You can access the files from anywhere as long as you have an internet connection. The files are safely protected behind a password prompt that you can set yourself (defaulted to your company, organization or surname)	\$75.00 /month (10tb)

Extra		(all time estimates are in standard def)
Drop off	We personally deliver your files on the delivery format of your choice.	N/A Price will heavily vary depending on length of trip, time of day, etc.
Fast delivery	We drop other clients to prioritize you. Usually delivered within 12 hours from receiving your units, depending on length.	\$650.00
Privacy Package	While we always strive to keep all parts of our process as private and anonymous as possible, this package is the "extra mile" for those who are very concerned about the contents of their video/audio being seen by anyone else but themselves. When getting this package, S&R will: rotate personnel between each step, only use visual indicators for the audio, view all video through thick sheet of distorting plastic making the video completely incognito to our workers. Furthermore, in case of unexpected visitors, all workstations are equipped with a "fail safe" that can be triggered by a button, instantly shutting all machines off, permanently wiping our copies and locking your original copy inside of whatever player it is currently in. If anyone were to try and get it out by force, the tape/disk/dvd/etc would self-wipe and therefore be completely empty by the time someone can get their hands on it. This is guaranteed to be the safest way to ensure that no one but yourself ever sees your videos or hears your audio. At S&R we Don't Ask, and we Don't Tell.	\$1,000.00
